# MILES & MEALS

## **MILES & MEALS** is Street food. Local Stories. At home.

A design to capture the worldly, exploratory and 'in motion' nature of the concept

Miles & Meals wants to let people experience the world's street food from home. By delivering curated street food experience boxes, they bring iconic dishes, local flavours and cultural stories from specific cities straight to your kitchen.

Every city or area is presented by **signature dishes** - a recipe that represents the city, the locals craft and their personal story - and translates it into an accessible at-home cooking experience. So ultimately, **Miles & Meals is a worldly yet accessible brand that focuses on exploration and the world at large.** This branding tries to capture that nature while remaining modern without feeling old-fashioned. That's what M&m is to me.

## ↙ LOGOS

MILES & MEALS

# MILES & MEALS

The logo immediately makes you think of **a lime**, a sour fruit that is often used in cooking. It also resembles a **parasol**. These can be found on international food vendors' stalls worldwide. Alongside that, the spokes of the parasol have been abstracted to also **resemble a wheel**, signifying the worldly, exploratory and 'in motion' nature of the concept. This The font is bold and stands out while still feeling modern.
